Power Management - PowerIQ®

Power IQ manages all your ethernet enabled rack power distribution units and in-line meters from one system including APC, Server Technology, Raritan and more.

Power IQ automates power control and enables powerful analytics reporting of your energy consumption, temperature readings, active power, line capacities and carbon footprint. Trending reports and cumulative totals can be displayed at the data center, floor, room, rack, customer and IT device level. You can also generate customer energy billback cost reports.

Note: The term "Devices" is equivalent to a rack PDU. For example 20 Dominion PXs = 20 devices.

Intelligent Power - Dominion PX Series - Inline Metered

The inline metered PX models support all the PX functionality except remote outlet-level switching. They are intended to be inserted in existing power feeds where metering and environmental monitoring are desired. They operate over a range of voltages and amperages. The actual voltages and amperages are determined by the data center wiring.
