Affordable, high-quality, KVM-over-IP for the evolving small or midsize business

Get more, pay less!

Raritan's Dominion LX KVM-over-IP switches give one or two remote users, with an independent local port, BIOS-level access and control of 8 or 16 servers. With flexible tiering (cascading) users can manage up to 256 computers from a single console.

These appliances, specifically designed for small to midsize businesses (SMBs), offer economical, remote access from anywhere; efficient, reliable server management; and an affordable feature set.

Dominion LX benefits include:

- ▶ Efficient, reliable server management
- ▶ Economical, secure remote access from anywhere
- ▶ Economical footprint
- ▶ Efficient server diagnostics and restore capabilities
- ▶ Reduced travel time and training costs
- ▶ Cable package options for a minimum initial investment

The screenshot shows the web management interface for a Raritan Dominion LX switch. The interface is organized into several sections:

- Time & Session:** Shows the current date and time (December 31, 1999 19:02:50), user (admin), state (31 sec idle), IP address (192.168.58.42), and last login (Dec-31, 1999 19:01:04).
- Device Information:** Lists device name (DominionLX), IP address (192.168.58.105), firmware (2.4.5.125), and device model (DLX-216).
- Port States:** Shows 2 ports up, 14 ports down, and 16 ports idle.
- Connected Users:** Lists active users: admin (192.168.58.42) for 31 sec, and admin (Local Console) for 1 min.
- Online Help:** A section for user assistance.
- Favorite Devices:** Currently set to 'None'.
- Port Access Table:** A table with columns for 'A No.', 'Name', 'Type', and 'Status'. It lists 16 ports, with Port 1 being 'Not Available' and down, Port 2 being 'Dual-VM' and up, and Ports 3-16 being 'Not Available' and down.
